

Description

HZ-THZ BT-0050-1 is a 2.4mm bias tee (also known as bias T) that operates from 50 KHz to 50 GHz with a bias rating of 25 VDC and 500 mA. This bias tee is configured with 2.4mm inputs on the RF ports and 2.4mm on the bias port. BT-0050-1 2.4mm bias T offers good electrical performance featuring 1.5 dB insertion loss and 30 dB isolation. Bias tees are typically used to inject a DC signal into an RF path such as when biasing an amplifier or any other active device, supplying power to the connected output without disrupting the RF signal. They can also be used as DC returns to provide a ground return path for the input device or DC blocks to prevent direct current signals from flowing through the output device. HZ-THZ bias tees are available in various connector configurations over different frequency bands to fit your needs, all of which shipped worldwide the same day.
